FOR MORE INFORMATION VISIT NISSAN.COM.AU

[^]Towing capacity is subject to towbar/towball capacity. The capacity may be reduced if a non genuine Nissan towbar is fitted. The permitted download is directly related to the laden mass of vehicle. The maximum towball download is 300kg (4WD models). [⊗]Figures tested in accordance with ADR81/02 (combined test). Figures stated for the purposes of comparison amongst vehicles only. It is unlikely that this fuel consumption figure will be achieved in real world driving conditions. Actual fuel consumption depends on factors such as traffic conditions, vehicle condition, how you drive and any accessories fitted. -Payload is the GVM minus the kerb mass. The kerb mass does not include passengers, luggage, cargo, any accessories fitted or any towball download (as appropriate). Payload is distributed across both the front and rear axles, never exceed the GVM or the axle limits. [†]Leather accented features and upholstery may contain synthetic material.
